PROFESSIONAL SUMMARY

Principal Data Engineer with 6+ years of experience designing scalable batch and real-time data platforms on Azure. Expertise in Medallion Architecture, data validation automation, cloud infrastructure (Terraform), and AI-integrated APIs using LLMs. Proven ability to architect enterprise-grade ETL pipelines, improve data quality frameworks, and build secure, production-ready systems using Databricks, Snowflake, and Azure services.

Strong background in API engineering (Flask, FastAPI), distributed data processing, and infrastructure automation. Passionate about AI-enabled data systems and cloud-native architectures.

CORE SKILLS

Cloud & Data Platforms: Azure Databricks, Azure Data Factory, Microsoft Fabric, Snowflake, Azure Functions

AI & ML Integration: Azure OpenAI (LLMs), AI-assisted anomaly detection

Data Engineering: ETL/ELT, Medallion Architecture (Bronze–Silver–Gold), Delta Tables, Data Quality Frameworks

API & Backend: Flask, FastAPI, SQLAlchemy, Microservices, Swagger

Streaming & Messaging: Azure Event Hub

Programming: Python, SQL, Java, PHP, PySpark, JavaScript

Infrastructure & DevOps: Terraform, Docker, GitHub Actions

CERTIFICATIONS

SnowPro Core Certification — *Snowflake* (Issued Mar 2025)

Azure Data Engineer Associate (DP-203) — *Microsoft* (Issued Jan 2023)

Azure Databricks & Spark For Data Engineers — *Udemy* (Issued Jun 2023)

Azure Data Factory For Data Engineers — *Udemy* (Issued Nov 2021)

Building REST APIs using Flask & Python — *Udemy* (Issued Aug 2020)

Docker for Absolute Beginners (DevOps) — *Udemy* (Issued Sep 2020)

React JS Web Development – The Essentials Bootcamp — *Udemy* (Issued Oct 2020)

GitHub Copilot – The Complete Guide — *Udemy* (Issued Nov 2024)

PROFESSIONAL EXPERIENCE

Principal Software Engineer (Sr Data Engineer)

Costrategix | Mar 2025 – Present

Project: Kroger – Retail Bulk Data Services

- Architected scalable real-time pipelines ingesting data from Azure Event Hub into Medallion layers (Bronze → Silver → Gold).
- Designed batch-aware metadata tracking for improved lineage and traceability.
- Built a configurable SQL-based data validation framework with threshold-based checks to ensure data integrity.
- Implemented monitoring dashboards using Datadog to track processing accuracy and quality metrics.
- Improved operational visibility and reduced data discrepancies across environments.

Tech Stack: Azure Databricks, Azure Event Hub, ADLS Gen2, GitHub Actions, Datadog

Member Software Engineer (Data Engineer)

Costrategix | Jun 2023 – Mar 2025

Project: QGrid – QIntel (AI Data Quality Platform)

- Developed production-grade Flask REST APIs integrating ML models for anomaly detection (Freshness, Schema, Volume, Distribution).
- Built a SQL AI Assistant API leveraging Azure OpenAI (LLM) for intelligent query generation.
- Designed AI-driven anomaly grouping and descriptive tagging system to enhance data quality insights.
- Containerised services using Docker and deployed via CI/CD pipelines.

Tech Stack: Flask-RESTX, Docker, PostgreSQL, SQLAlchemy, Azure OpenAI, Azure DevOps

Project: Patient Point

- Re-engineered Snowflake role-based access model, eliminating redundant roles and strengthening data governance.
- Automated infrastructure provisioning using Terraform, improving deployment consistency.

Tech Stack: Snowflake, Terraform

Project: Internal Fabric POC

- Led proof-of-concept evaluation of Microsoft Fabric for enterprise adoption.
- Designed pipeline for analysing Azure and AWS cloud cost data within the Fabric ecosystem.
- Provided architecture recommendations for future data platform modernisation.

Tech Stack: Microsoft Fabric, ADLS Gen2

Associate Software Engineer (Data Engineer)

Costrategix | Apr 2021 – Jun 2022

Project: Empower Data Cloud (EDC)

- Designed modular ETL pipelines using Azure Data Factory following Medallion Architecture.
- Integrated multiple source systems into Snowflake via ADLS Gen2.
- Built batch validation services using Azure Functions (Python) to enforce data quality checks.
- Improved reliability of batch processing workflows.

Tech Stack: Azure Data Factory, Azure Functions, Snowflake, ADLS Gen2

Project: Kroger – Brand Matching & Image Processing

- Enhanced large-scale ingestion pipelines using Azure Databricks and Delta Tables.
- Developed image processing workflows analysing millions of product images for compliance and quality.
- Extracted image features (FACTS) and business rule flags (JUDGEMENTS) using Azure Cognitive Vision.
- Built scalable APIs and integrated ML-based product matching systems.
- Automated infrastructure provisioning using Terraform.

Tech Stack: Azure Cognitive Vision, Databricks, Azure Functions (Python & Java), Docker, Azure Blob Storage, Terraform

Trainee Software Engineer

Costrategix | Sep 2019 – Apr 2021

Project: Rokkitwear (E-Commerce Platform)

- Delivered production fixes and feature enhancements for a high-traffic e-commerce application.
- Improved UI/UX by implementing filtering and thumbnail optimization.
- Refactored legacy PHP codebase following MVC best practices.

Tech Stack: PHP, MySQL, Zend Framework, Git, MVC

Project: Kroger USDA Automation

- Automated USDA data ingestion pipeline using Azure Functions.
- Developed Dockerised Flask API for ML-based product matching predictions.
- Provisioned Azure infrastructure components using Terraform.
- Reduced manual processing effort through automation.

Tech Stack: Azure Functions, Azure Event Hub, Flask, Docker, Microsoft SQL Server, Terraform

EDUCATIONAL DETAILS

S. NO	Course	Board/University	College/Institution	Year	Marks %
1	B.Tech (CSE)	JNTUA	Brindavan Institute of Technology & Science - Kurnool	2019	75%
2	XII Class	Intermediate, A.P	Nalanda Junior College – Kurnool	2015	87%
3	X Class	SSC, A.P	Zilla Parishad High School (Z.P.H.S) - Nannur	2013	93%
